

Center for Cancer and Blood Disorders at Phoenix Children's

Arizona's largest pediatric cancer program

Hearing that your child has cancer is frightening for parents. It can change a child's and family's life in an instant. At Phoenix Children's Center for Cancer and Blood Disorders, we are home to some of the world's leading specialists, each with a specific area of expertise within hematology and oncology. Using a family-centered approach to care, our Center provides an unrivaled breadth of treatment options for babies, children, teens and young adults with cancer and blood disorders. As a result, we can offer the highest level of care and programs to patients and families — giving them healing and peace of mind when they need it the most.

By the Numbers

17K+ square ft. dedicated to cancer care

30K+ clinic visits each year

35+ oncology and hematology providers

380+ new cancer diagnoses annually

500+ bone marrow transplants performed to date

16K+ new hematology diagnoses annually

100+ active clinical trials

Team of Experts

Our Center is made up of top-in-their-field pediatric specialists dedicated to specific areas within hematology and oncology, which enables us to keep up with the latest advancements in the treatment of cancer and hematologic disorders. Our team also works closely with the Phoenix Children's neurosurgery program, radiology and other areas to provide each patient with compassionate care, innovative treatment options and novel clinical therapies.

Research Breakthroughs

In addition to providing exceptional patient care, we strive to eradicate childhood cancer and blood disease through research. We collaborate with many academic and industry sponsors to give the children of Arizona the most promising treatments available for their diseases while developing innovative and more effective ways of curing children with cancer in the future. As one of 200+ international members of the Children's Oncology Group, we have more than 110 active clinical trials open at any time.

Contact Us
